Bootcamp: Javascript development Boot Camp
Project: mini-Challenge
Project Type: Easy
Requirement : Javascript

Note to mentors: Please ask campers to create a separate folder and file. Each challenge should have an index.html and script.js file.

Note to Campers: Only Git URLs are accepted. You cannot solve the problem, please do not hesitate to ask from your colleagues and mentors. Some of the exercises might be challenging but give your best to get as close as possible.

Write a simple program to accept a Persian string and convert it to English number.

Example:
- Input ۹۸ output 98
- Input ۰۹۲۱۳۷۵۵۳۱۰ output 09213755310

Note that mono characters will be passed to the function but if any throw an exception.
For example: سلام۱۲۴ throws exception.
